

## About us

Although I have lived and worked in Durban for most of my life I have never got used to the Durban summers but the winters are mild - I think it's the best time of the year here - glorious warm days and cool evenings with the odd very cold snap just to remind us that it is really winter!

This year holds a new set of circumstances for each of us - if we live each day with enthusiasm and give it our best shot, we can create a better tomorrow - here's hoping all your tomorrows will be great.

My four-legged children inspire me daily with their enthusiasm and zest for life so I would like to introduce them to you.....

Serena is my gentle "old lady" at 10, Timmy my very vocal 6 year old "lad" who has had a new lease on life with the addition of Hana my young black and white bitch who with her very gentle and loving silver brother Nuri are almost two years old now. Not to be forgotten is Cleo, a tabby who walked into my life two years ago and is treated with respect by the four Salukis.

Pets are an important part of our lives and I love the challenge of capturing the beauty, spirit and individual personality of each special pet in my photographs - giving you a way to keep their memory alive forever.

Capturing special moments is often easier in a relaxed home environment so I would encourage home photo sessions for those really special photos.

Photography has always, for me, been an exciting adventure with new horizons appearing every day and is certainly a means of sharing the beauty I see. Although my passion for animals has led me to "specialise" in dogs and cats, I do cover a wide range of photographic subjects.

Being the perfectionist that I am, and working on my own, it often takes a little longer to produce the high quality photographs that I strive for at all times - please be patient, the wait will be worth it.

I am very passionate about health issues having overcome several challenges in the past few years. I really believe we should be looking to nature to provide us with the

answers and remedies for all our health problems. I encourage you to read through the articles I have written on health issues and hope that I may be of assistance somewhere along the way.

Let us make this a year of true beauty by providing optimum nutrition for our pets and ourselves and taking care of our wonderful environment.

Please browse through the pages and .....enjoy.
